Subject: ACCG-IRMA Contribution Breakdown

This document serves to provide assistance in breaking down the IRMA contribution by department for cost allocation purposes. There are numerous acceptable ways of effectively allocating the contribution to the various departments within your county. We have developed one method that will allow you to customize your contribution breakdown according to your county's specific needs. We have attempted to simplify the allocation process due to the many factors that go into the renewal pricing, so that you can easily allocate the contributions as you see fit.

We have provided a standard exposure basis for each of the coverage areas below as well as the exposures you recently provided to us for the renewal. Also provided is the percentage of contribution for each category as it relates to your total contribution. Based on this percentage and the exposures within that category, we have developed an estimated allocated cost per unit for the deductible purchased in the previous coverage period. (If the county chooses a different deductible for the renewal coverage period, you can pro-rate these costs accordingly). In order to calculate a specific department's share of the contribution for a particular category, multiply their portion of the total exposure by the allocated cost per unit.

Coverage	Exposure Basis	Total Exposures	Cost Per Unit	% of Contribution
General Liability, Law Enforcement Liability, Public Officials Liability and Crime	Payroll (Per \$100)	\$3,801,506	\$0.81	27%
Automobile Liability	# of Vehicles	64	\$590	33%
Auto Physical Damage	# of Vehicles	60	\$454	24%
Property, Boiler & Machinery	Total Insurable Values (Per \$100)	\$18,888,755	\$0.09	16%
Total Contribution				\$113,495
Excess Liability (if applicable)				\$6,925
Safety Credit (if applicable)				-\$5,675
Rate Credit (if applicable)				-\$2,589
Dividend Credit (if applicable)				-\$0

As an example for the first coverage category, if the Road Department has payroll of \$1,000,000 and an allocated cost per unit for Liability is \$2.2, you would calculate their portion of the contribution as follows:

$$\$1,000,000/\$100 \text{ Per Payroll} \times \$2.2 = \$22,000$$

On the Auto Liability and Physical Damage, for example, if the Road Department has 10 vehicles and an allocated cost per unit is \$360, you would calculate their portion of the contribution as follows:

$$10 \text{ Vehicles} \times \$360 = \$3,600$$

For the Property and Boiler & Machinery coverage, if the Road Department has \$2,000,000 in total insurable values according to the ACCG-IRMA Statement of Values form and an allocated cost per unit of \$.094, you would calculate their portion of the contribution as follows:

$$\$2,000,000/\$100 \text{ Per TIV} \times .094 = \$1,880$$

As for the Excess Liability that your county may have purchased, since the coverage applies excess over your General Liability, Public Officials Liability, Law Enforcement Liability and Auto Liability coverages, you could allocate the same proportion of the Excess Liability to each of the departments. For instance, if the Road Department is responsible for 20% of the General Liability, Public Officials Liability, Law Enforcement Liability and Auto Liability contributions according to the above cost allocation process, they would pay 20% of the Excess Liability contributions. The same principal could apply to the Safety and Dividend Credits, if you received them for this Coverage Period, and you would like it credited to each of the departments.

Of course, if you have any questions about how to work with this suggested format or if you have any other questions about the allocation of costs, please give me a call. As always, we appreciate your membership in the ACCG-IRMA and look forward to working with you in the coming year.

Sincerely,

Matt Autry, ARM-E, CIC, CSRM
